

StackoverFlow Developer Survey 2019 Data Analysis

Sagar Suresh Varandekar
22nd June 2022

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

1. Popular Programming Languages and Databases For Current vs. Future
2. Gender Gaps in Software Development Field
3. Technologies Gaps in Countries

INTRODUCTION

About:

Data analysis on Stack Overflow Developer Survey about the trends in developer's favorite technologies varied by countries and genders

Purpose:

1. What are the top programming languages in demand?
2. What are the top database skills in demand?
3. What are the popular IDEs?

Target Audience:

Software Developers, Software Engineering Manager/Lead, HR Managers

METHODOLOGY

1. Sources for Data Collection

- The 2019 Stack Overflow Developer Survey Results
- Github Job Postings
- Annual Salary for Programming Languages

2. Data Cleaning

3. Data Mining and Analysis

4. Data Visualization

5. Presentation

RESULTS

- Top Programming Languages currently in use are Javascript, HTML/CSS, SQL, PowerShell and Python.
- Top Programming Languages people desire to learn next year are Javascript, Python, HTML/CSS, SQL and Typescript.
- Top Databases currently in use are MySQL, PostgreSQL, MicrosoftSQLServer, SQLite and MongoDB.
- Top Databases currently people desire to learn next year are PostgreSQL, MongoDB, Radia, MySQL and Elasticsearch.
- Top platforms currently in use and people desire to learn are Windows and Linux.
- Similarly, top Webframeworks currently in use and are desired to learn are jQuery, React.js and Angular.js.
- More than 80% of tech professionals are men and there exists a huge gender disparity in tech industry.
- USA has the most number of skilled professionals in Tech field.
- Majority of Tech professionals atleast have educational level of Bachelors degree or above.
- Tech professionals are mostly young with a median age of 29 Years.
- Median annual compensation of Tech professionals globally is USD 57745.

PROGRAMMING LANGUAGE TRENDS

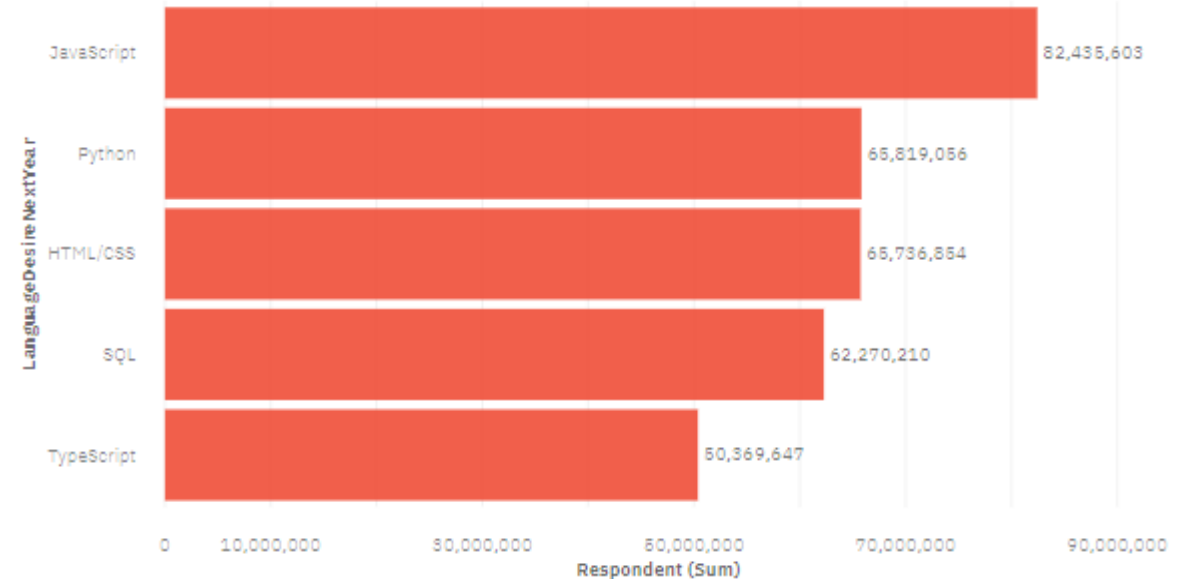

Current Year

Top Programming Languages used

Next Year

Top Languages desired to learn Next Year

PROGRAMMING LANGUAGE TRENDS – FINDINGS & IMPLICATIONS

Findings

- C#, HTML/CSS and Javascript are the top 3 languages that software developers have worked with.
- Python becomes one of the top preferred languages to be mastered in future.
- Knowledge in SQL still high in demand for future.

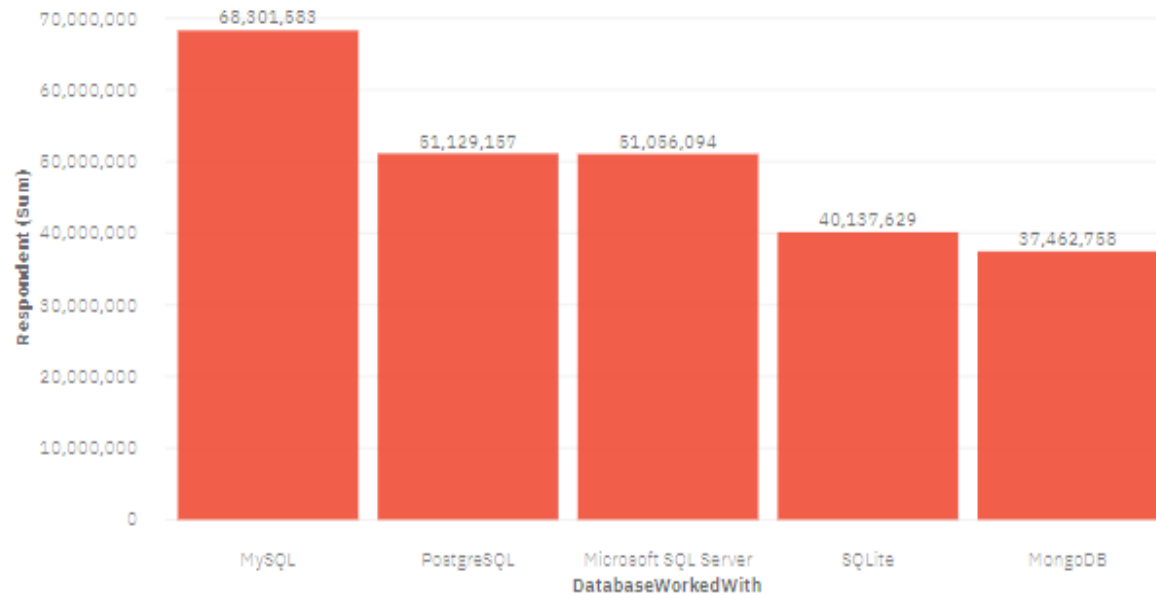

Implications

- Website development is still high in demand for future.
- Python is the fastest-growing major programming language for Artificial intelligence / Machine learning fields.
- Data analytics / big data fields would require expertise in SQL.

DATABASE TRENDS

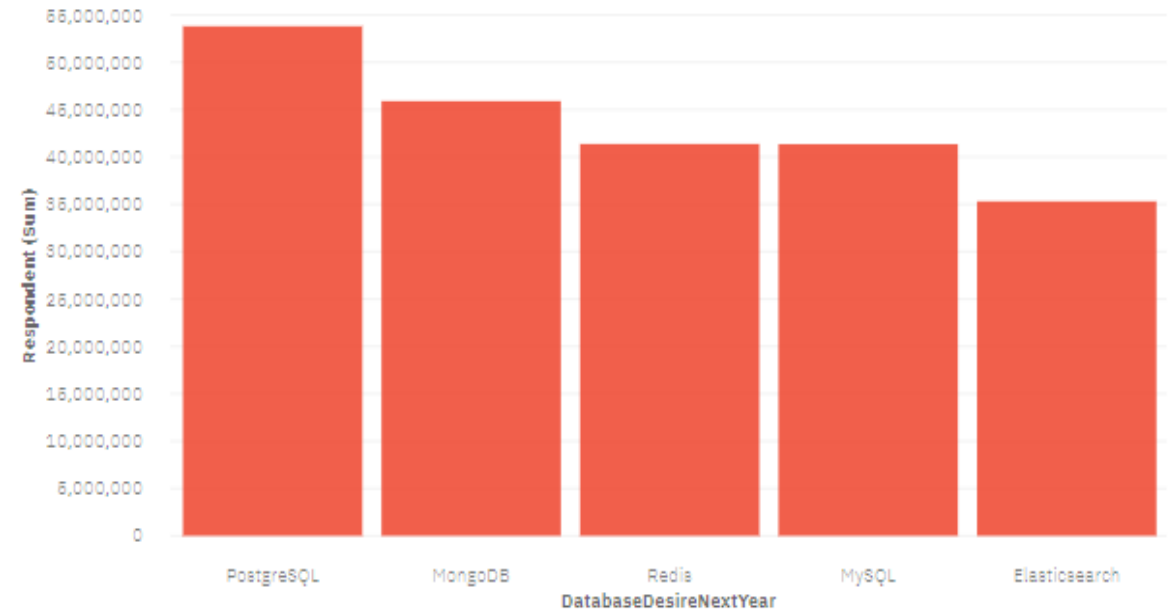

Current Year

Top Databases Used

Next Year

Top Databases desired to learn Next Year

DATABASE TRENDS – FINDINGS & IMPLICATIONS

Findings

- PostgreSQL and Redis started rising this year.
- Microsoft SQL Server is edged out from the list.
- MongoDB is another upcoming favorite database.

Implications

- Open source databases are preferable as they are highly efficient, especially with large databases.
- PostgreSQL is preferred by companies compared to Microsoft SQL Server because it is a free open source object-relational database system.
- MongoDB is rising as it is a NoSQL database which store big data of all kinds (structured/unstructured).

DISCUSSION

- The demand for the required skills in software technology for upcoming jobs.
- Increase women participation in software development fields.
- Provide trainings to the existing software developers who wish to learn new technologies.
- Enable more online courses for people who are interested to dive into software development or switch career.

OVERALL FINDINGS & IMPLICATIONS

Findings

- Fast changing technologies introduced every year.
- Many software technology expertise are from countries such as USA, India and Germany.
- Huge Gender Disparity in the Technology field.
- Tech professionals are mostly young with a median age of 29 Years.
- Median annual compensation of Tech professionals globally is USD 57745.

Implications

- Companies need to adapt to new technologies rapidly.
- More online courses or learning need to be shared with other countries in order to create more software professionals.
- Technology determines the direction of the future, and women need equal opportunity to shape that direction. Companies must ensure that sexism is avoided in the hiring process and in the workplace, and to continue building great initiatives to bridge the gender divide all over the world.
- The current generation of children will need to be literate in technology in order to be competitive in the future job market as most jobs require the knowledge of basic IT skills.

CONCLUSION

1. Adapt to new technologies rapidly as new technologies come up every year.
2. Enable more online resources for learning purposes all over the world.
3. Empower women pursuing software engineering roles.
